

CYBER SCORECARD

Data-driven Cyber Risk Management

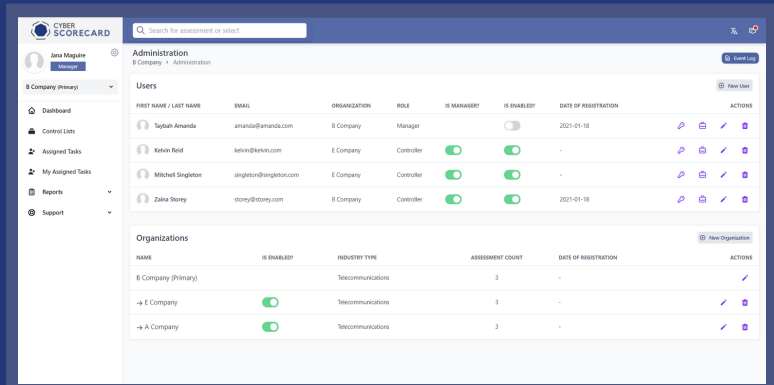

Adopt The NIST Cybersecurity Framework in Hours

The CSF is an absolute minimum of guidance for new or existing cybersecurity risk programs.

Many Teams, Many Risks, One Platform

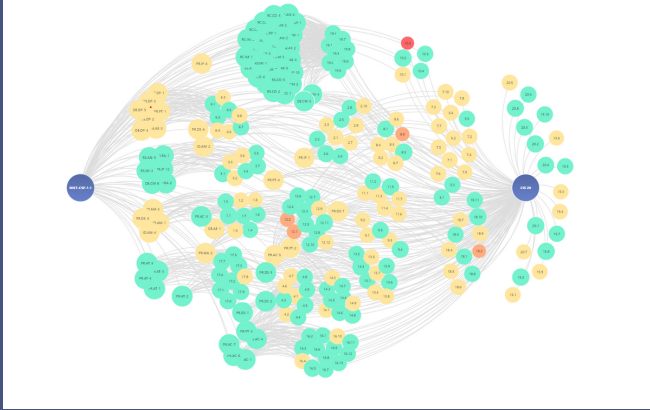

Evaluate the security controls in the Scorecard to which controls are implemented, operating as intended, and producing desired outcome.

CIS20, ISO27001 and PCI DSS Implementation

Protect your organization and data from known cyber attack vectors.

Multiple Framework Relational Category Rating

Cyber Risk Quantification

Executive Scorecard provides as review and action plan that includes the target state profile, the current state profile, gap analysis and overall cybersecurity maturity.
